

Required Supplies for this course:

- **A projector**

Any basic projector will work. This class focuses on *how* to use it, not on having a specific model. I have two options that I recommend.

 - [Expensive But Dependable - Epson](#)
 - [Mid-range and Dependable - Epson](#)
 - [Budget Friendly - Happrun](#)
- **An HDMI cable**

Most projectors come with one.
- **An adapter for your device**
 - [HDMI to Lightning](#)
 - [HDMI to USB-C](#)
- **A device with images**

Phone, iPad, or tablet with your reference images loaded.
- **Reference images**

Photos you plan to work from during the class.
- **A canvas**

Any size you'd like to work on.
- **An easel or wall space**

Somewhere you can hang or prop your canvas securely while projecting.

What You Don't Need

It's good to know that the following is not necessary to take this course.

- A high-end projector
- Advanced tech skills
- A perfectly dark studio
- Or a large workspace
